

CAREERS FOR THE **CURIOUS**

POSITION TITLE

Technical Brewer

COMPANY

Curious Brewery

ROLE BASE

Ashford, Kent

WHO ARE WE?

We are The Curious Brewery. Where flavour and passion comes first. We believe in trying to create things that others can't.

Our reason for being is to inspire people to stay curious. To question. To celebrate. To smile more. And to never graduate from the school of life. We decided to make the best tasting beer and cider, using just the best quality ingredients and our skill as England's leading winemakers.

The Curious Brewery was established in 2011 and is part of one of the UK's most exciting drinks companies and leading winemaker, Chapel Down.

KEY RESPONSIBILITIES

Brewing Operations

- Maintain high quality standards of our beers, monitoring & improving KPI's, whilst coaching your team on practical ways to sustain performance.
- Run the operation of the pilot plant, develop new recipe's and engage the full Chapel down & Curious teams to produce seasonal and scalable new beers.
- Lead process deep dives into key initiatives such as extract losses, plan attainment & capacity.
- Support & take ownership of key Capex and Opex projects.
- Cover holidays and sickness of Brewing supervisor role where necessary.
- Maintain a high level of process knowledge and share this knowledge with the wider team via on the job and classroom trainings.
- Carry out trouble shooting exercises with maintenance to ensure root cause correction, identifying and executing process adjustments when required.
- Liaise with suppliers to ensure delivery, quality standards & FIFO of raw materials.
- Ensure high standards of Hygiene & 5S are met by the production teams.

Environment, Health & Safety and Quality Processes

- Comply to ES, Quality and HACCP standards.
- Address safety concerns and incidents within the department.
- Promote safe working practices.
- Ensure compliance with all company and legal obligations and help to create SOP's
- Take ownership for adherence to processes within each area e.g. SLA's

Control of Cost, Budget and Resources

- Share accountability in the maintenance and utility cost performance across the department
- Improve energy / utilities consumption performance
- Ensure cost optimisation across all areas of the department
